NO BRAND TOKEN

Bottom line

Year to date we confirm **19 impersonating domains** across the UK defence sector, of which **8 are high severity** — credential capture or internal-system impersonation. **11 were still hosting** when probed on 3 August 2026.

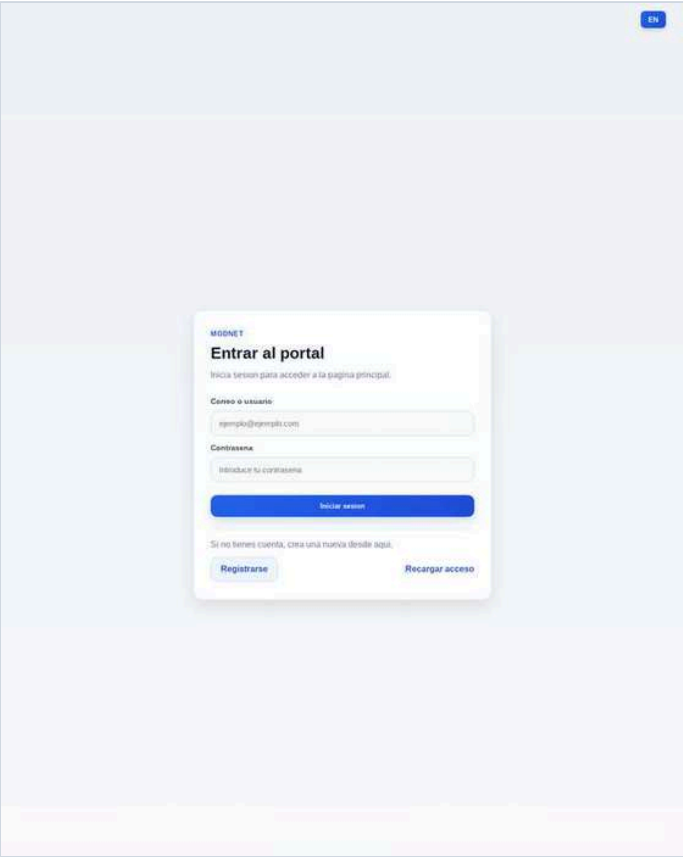

That number is small, and the reason it is small is the most important judgement in this report. UK defence has no consumer base to defraud. There is no defence equivalent of a bank login worth harvesting at volume, so commodity phishing operators — who drive almost all the volume in our corpus — have no business model here. What targets this sector instead is low-volume, highly targeted spear-phishing delivered by email to named individuals, and that does not appear in a web-scan corpus. A low count here is a statement about the *type* of threat, not its absence.

Two characteristics distinguish what we did find from ordinary phishing, and both point the same way:

- **These sites stay up.** Median time online is **96 days**, against 5 to 40 days for consumer-brand phishing in the same corpus. Six exceed 90 days and the oldest is **195 days**. Nobody is taking them down.
- **They impersonate *internal* systems, not customer-facing ones.** A corporate network login, an employee benefits portal, an engineering command centre, a defence intranet. These have no public audience — the only person who would ever visit is an employee, which tells you who the intended recipient is.

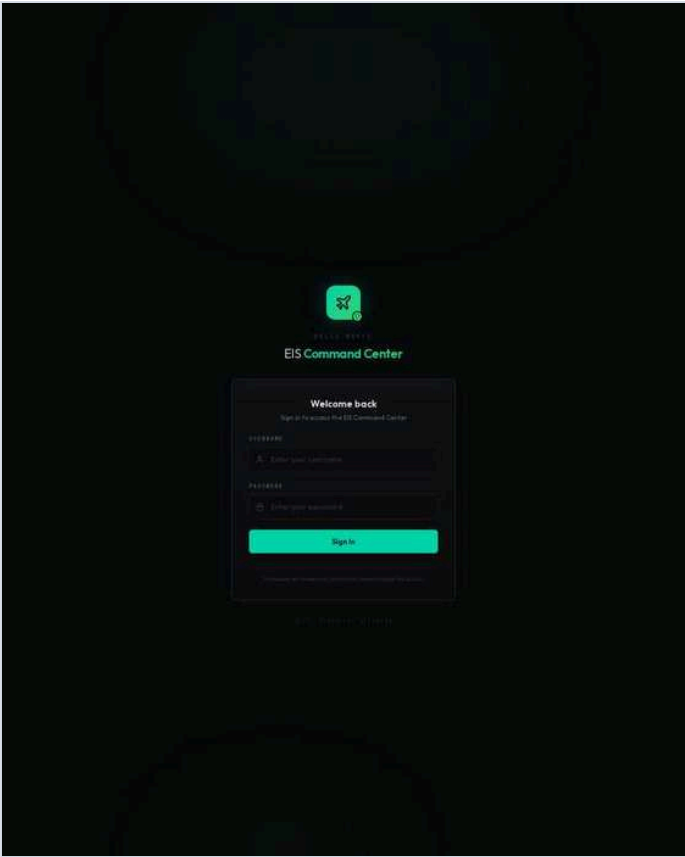

1 — Credential capture against primes and the MoD estate

8 findings present a login or account-creation surface for a named UK defence organisation. This is the category that matters: each one exists to take a working credential from someone who holds it.

modnet.space HIGH RESOLVING
ModNet | Login
2026-05-13 · 82d online · 178.105.119.195

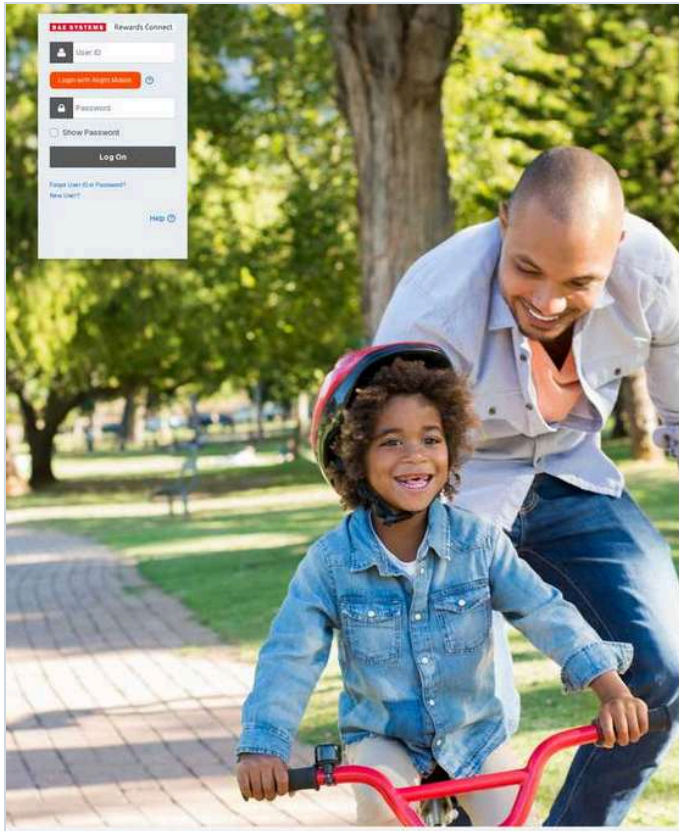

Renders 'ModNet | Login'. MODNET is the MoD's own corporate network; this is the single most sensitive impersonation in the set.

internalrr.com HIGH LIVE
EIS Command Center | Rolls-Royce Civil Aerospace
2026-03-09 · 147d online · 216.198.79.1

Renders 'EIS Command Center | Rolls-Royce Civil Aerospace'. The domain asserts an internal system and the page reproduces a named one.

The two most serious findings in the year to date. `modnet.space` renders "*ModNet | Login*". MODNET is the Ministry of Defence's own corporate network — the domain is not impersonating a public service but the internal desktop environment of the department. One qualification, visible in the screenshot: the page body is in Spanish ("*Entrar al portal*"), so this may be a generic credential kit that has adopted the MODNET name rather than a UK-tailored operation. The reuse of the name on a live login page is the reportable fact; deliberate UK targeting is not established and we are not claiming it. `internalrr.com` renders "*EIS Command Center | Rolls-Royce Civil Aerospace*"; the domain itself asserts "internal RR" and the page reproduces a named internal system. Neither has any conceivable legitimate audience outside the organisation concerned.

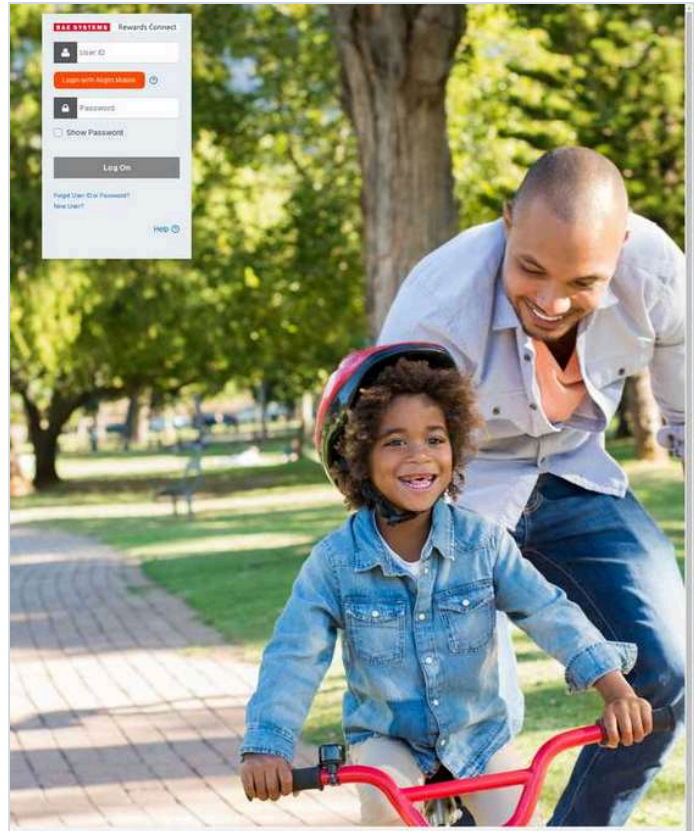

baesystems-align.com **HIGH** **OFFLINE**

Login - BAE Systems

2026-05-23 · 72d online · 216.198.79.1

.....

Renders a BAE Systems login page. Credential capture against the UK's largest defence prime.

baesystemsbenefitportal.online **HIGH** **OFFLINE**

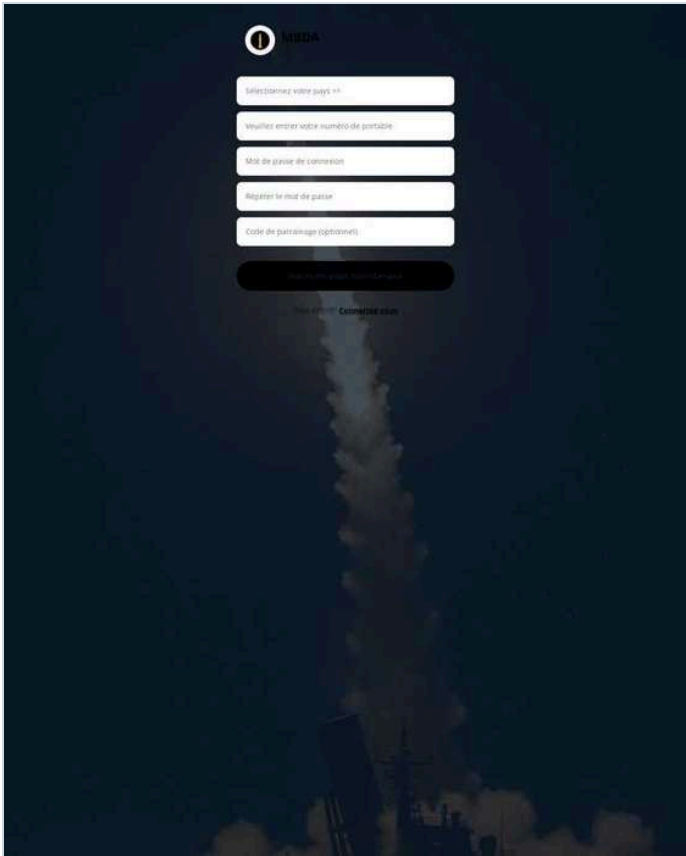

Login - BAE Systems

2026-03-21 · 135d online · 104.26.8.44

.....

Renders a BAE Systems login page framed as an employee benefits portal - an HR pretext rather than an IT one, which typically bypasses security-awareness framing.

Two separate domains render a **BAE Systems login page**. The second is framed as an employee *benefits* portal rather than an IT system, which matters operationally: HR and payroll pretexts route around the mental model most security-awareness training installs, because staff are conditioned to be suspicious of IT requests and comparatively relaxed about benefits administration.

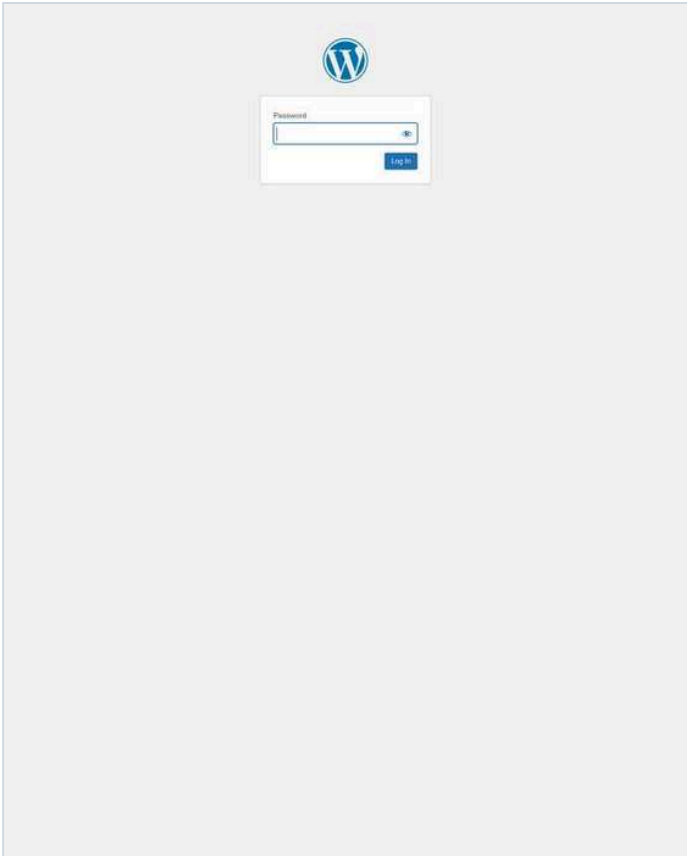

sansiro.monster **HIGH** **RESOLVING**

MBDA - Créer un compte

2026-03-02 · 154d online · 142.251.30.95

Renders 'MBDA - Créer un compte' (create an account) on an unrelated throwaway domain. Account creation against a missile-systems manufacturer.

mmemd-map.com **HIGH** **LIVE**

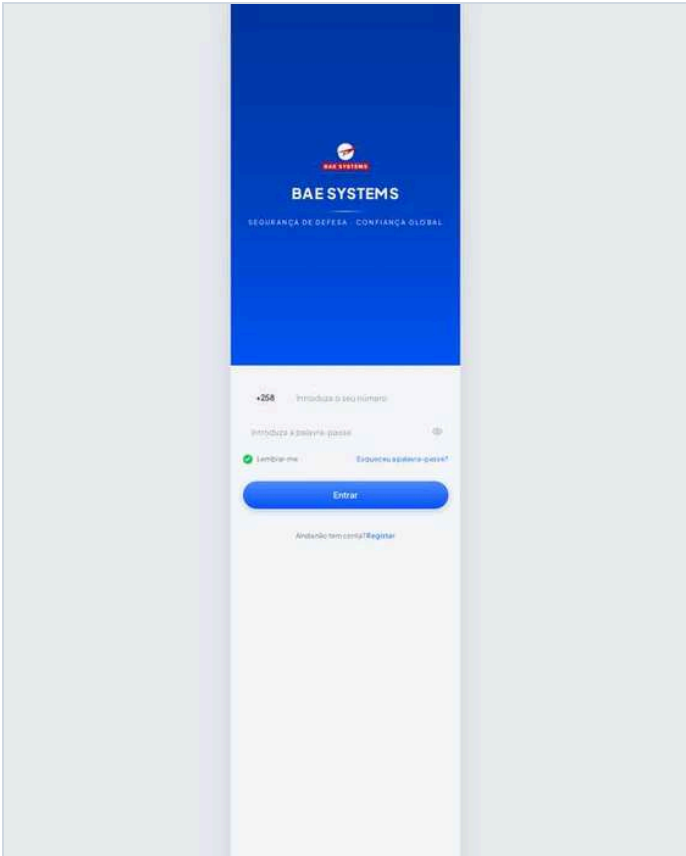

MMEM Defence Intranet

2026-03-16 · 140d online · 175.45.125.149

Renders 'MMEM Defence Intranet' - an intranet presentation with no corresponding organisation.

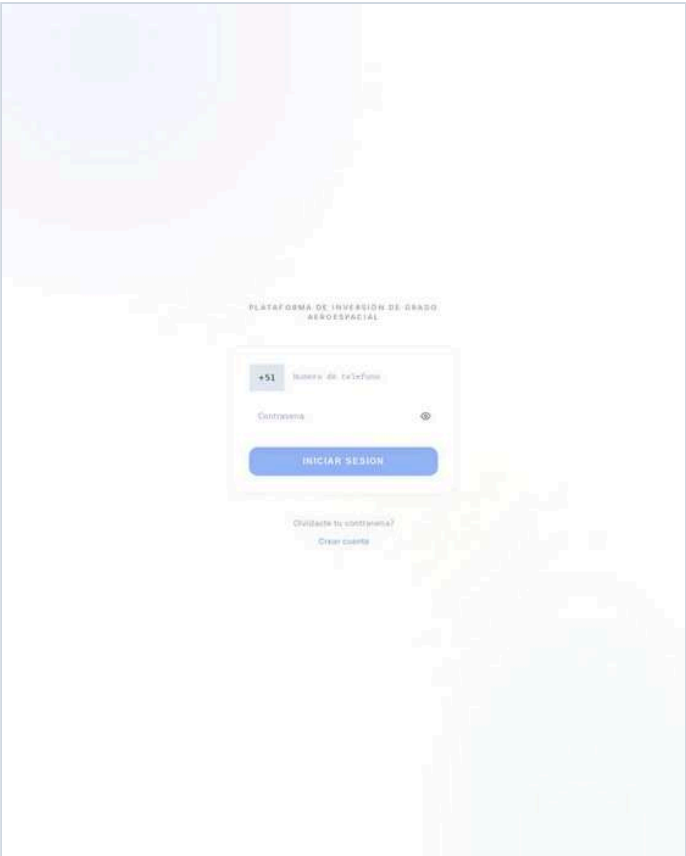

sansiro.monster renders "MBDA - Créer un compte" — an account-creation page for a European missile-systems manufacturer, served from a wholly unrelated throwaway domain on a .monster TLD. The French-language rendering is consistent with MBDA's actual footprint rather than a generic English kit. mmemd-map.com presents as a "Defence Intranet" with no corresponding organisation anywhere.

A brand-abbreviation pattern worth watching

baesys-mz.com **HIGH** **OFFLINE**
BAE SYSTEMS
2026-05-18 · 77d online · 52.74.50.42

Renders 'BAE SYSTEMS' on an abbreviated brand domain with a country-style suffix.

baesys-pe.com **HIGH** **RESOLVING**
BAE Systems
2026-02-27 · 157d online · 52.221.233.89

Renders 'BAE Systems'. Same abbreviation pattern and naming scheme as baesys-mz.com.

Two further domains, `baesys-mz.com` and `baesys-pe.com`, use the same abbreviation of the brand followed by a two-letter country-style suffix. A permutation list seeded on "BAE Systems" would catch these; one seeded only on exact-match variants would not. The pair also implies a naming scheme with further members not yet observed, and the suffix convention is the thing to monitor rather than the two domains themselves.

2 — Supply-chain and procurement lures

5 findings target the supply chain rather than the primes directly. This is the softer edge of the sector: an SME bidding for MoD work has the same access to programme detail and personnel as a prime, with a fraction of the security function.

DefenceBidSolutions

Expert Positioning in Defence Supply Chains

Defence procurement is exceptionally rigorous—governed by intense regulatory compliance, precise security clearings, and strict social value metrics. As an aligned division of HealthBid Solutions, DefenceBid Solutions brings years of framework success directly into the defence enterprise, translating complex requirements into clear, winning corporate propositions.

Our Core Competencies

Bid Writing & Management

Full end-to-end management of your SQ, PQO, and RTT responses. We track critical schedules, orchestrate win-themes, and draft technically flawless submission narratives.

MOD Framework Navigation

Strategic positioning to successfully gain entry to key procurement channels, including the Defence Sourcing Portal (DSP), regional frameworks, and Crown Commercial Service (CCS) defence lots.

Defence Translation Services

Specialised translation and localisation capabilities tailored for international defence tenders and documentation. We possess proven, direct experience in Ukrainian translation services to support collaborative operational frameworks.

3 — Recruitment and event pretexts

Employment-themed approaches are the publicly documented initial-access pretext against defence and semiconductor targets, and three findings sit in that space.

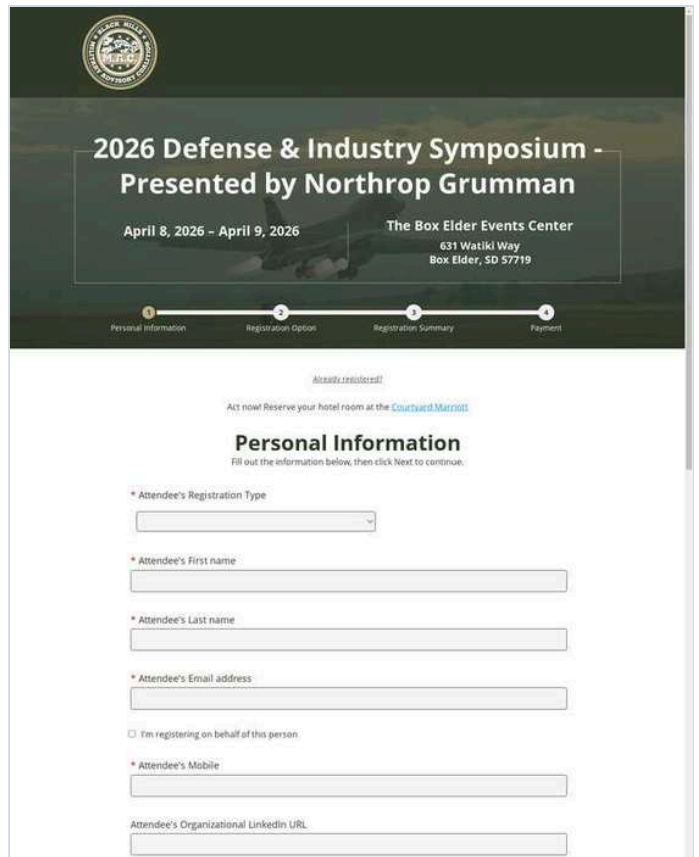

raytheon.tx.jobs.info MEDIUM LIVE

Raytheon TX Jobs

2026-05-14 · 81d online · 172.66.151.200

'Raytheon TX Jobs' on a brand-bearing .info domain. Employment-themed lures against defence primes are the tradecraft publicly reported against the sector.

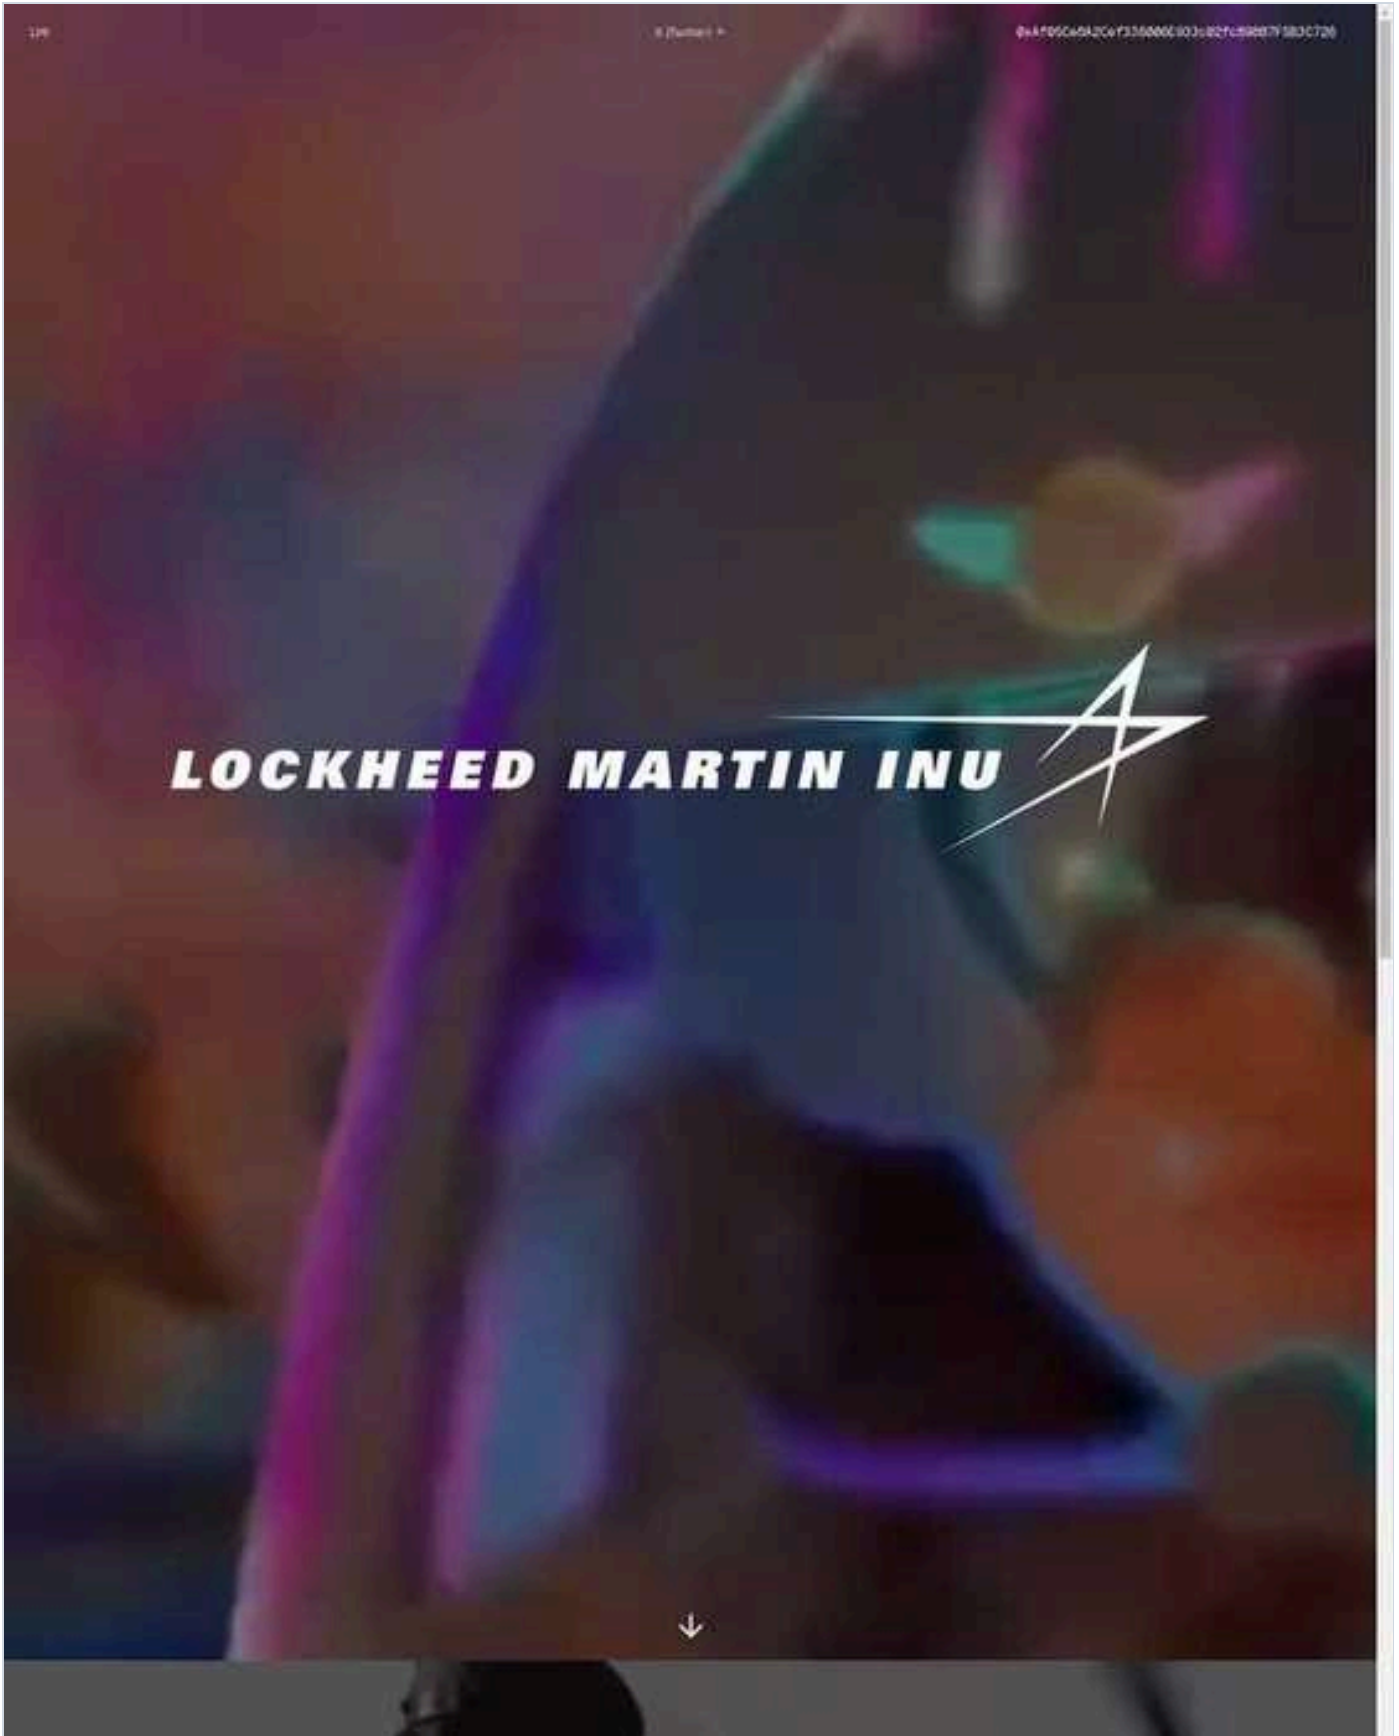

defensesymposium.info MEDIUM RESOLVING

Personal Information - 2026 Defense & Industry Symposium - Prese

2026-03-10 · 146d online · 13.226.144.46

'Personal Information - 2026 Defense & Industry Symposium'. An event registration form collecting personal data from defence-industry attendees.

raytheon.tx.jobs.info carries the brand in the domain and presents as a Raytheon jobs board. defensesymposium.info is the more interesting of the two: it renders a page headed "*Personal Information*" for a "2026 Defense & Industry Symposium". Conference registration is an unusually good collection pretext for this sector — it is normal for such a form to ask for employer, job title, clearance status and contact details, and the target has no reason to find any of that unusual.

lmi.army MEDIUM LIVE

Lockheed Martin Inu

2026-05-21 · 74d online · 34,149,250.58

Registered on the .army TLD rendering 'Lockheed Martin Inu'. The TLD choice is the signal.

One further finding uses identity framing rather than a login. `lmi.army` sits on the `.army` TLD rendering a Lockheed Martin variant — the TLD choice is doing the credibility work, since a sponsored military TLD reads as authoritative to a recipient who does not know it is openly purchasable.

4 — Why these survive so much longer than consumer phishing

96 MEDIAN DAYS ONLINE	195 LONGEST ONLINE	6 OVER 90 DAYS	19/19 SEEN WITHIN 7 DAYS OF REGISTRATION
---------------------------------	------------------------------	--------------------------	---

Of 19 findings with a recoverable registration date, 19 were observed within seven days of registration. Detection is not the constraint. Yet the median finding has been online 96 days and 6 have passed ninety.

The asymmetry is structural, and it is fixable. A fake bank login is reported by customers within hours, because a bank has millions of them and a mature abuse channel. A fake defence intranet has no customers. The only people positioned to notice are employees of the impersonated organisation, and the site is built so that anyone who does notice has already handed over a credential. Nothing generates the report that triggers a takedown — which is precisely why external monitoring, rather than inbound abuse reporting, is the only mechanism that works for this sector.

5 — What we excluded, and why the screening mattered

The sweeps returned **602 candidates** and **19 survived**. In no other sector we have assessed has the ratio been this poor, and the reasons are specific to defence naming. Every example below was in our candidate set before removal.

Excluded	Why
MOD Pizza	A US restaurant chain. Contributed roughly twenty domains and would have been the single largest "MoD" cluster in the report.
Babcock Ranch	A town in Florida — matched a skincare clinic and a professional organiser.
RAF Air Cadets	Several dozen legitimate squadron websites (1471squadron.co.uk, 2431rafac.org and similar). Real youth organisations, not threats.
"DE&S"	Matched "de S" in Spanish and Portuguese titles — a Brazilian accountancy, a Portuguese manor house.
"DII"	An Indian market term (Fil/DII), a Guatemalan industrial distributor and a home-decor brand.
"Ultra"	Ultra-luxury property, ultra-HD streaming, ultra-absorbent pet pads.
Royal Navy	Naval rum retailers, regimental museums, a history author and a Bristol memoir.
"SC Group"	Ten domains belonging to an unrelated B2B lead-generation network sharing Supacat's parent-company name.
"GCAP"	Nepalese trekking permits — ACAP, MCAP and GCAP are conservation area permits.
Genuine organisations	Leonardo Hotels, Rolls-Royce Motor Cars, Blue Light Card and Royal British Legion branches all survived automated filtering and were removed by hand.
Activism and journalism	A Chemring protest site and GKN chemical-leak community campaigns. Legitimate speech, not threats.

On method. Because the surviving set is small, every finding in this report was verified by reading its rendered page rather than by rule. That is not scalable to a consumer-brand corpus, but at twenty findings it is both practical and correct, and it is why we are willing to attach named organisations to each one.

6 — Recommendations

- **Monitor internal system names as brand assets.** MODNET, EIS, employee benefit and intranet naming appear here explicitly. These are not in any commercial brand-protection feed because they have no consumer footprint, yet they are what is actually being reproduced.
- **Assume no inbound abuse reports.** Nothing in this sector generates the customer complaint that drives consumer takedown. Detection has to be external and scheduled, and the 96-day median is the cost of not having it.

- **Extend monitoring to the supply chain.** A third of findings target suppliers rather than primes, using pretexts that self-select for MoD-adjacent businesses. Primes should treat supplier-facing impersonation as their own exposure.
- **Watch the abbreviation and TLD patterns, not just the exact names.** `baesys-mz` / `baesys-pe` imply a scheme with further members; `.army` and `.monster` are being used for credibility and for disposability respectively.
- **Read this alongside email telemetry.** The espionage-grade activity against this sector is email-delivered and will not appear here. This assessment covers the published layer only, and is complementary to, not a substitute for, mail and endpoint visibility.

Assessment notes

Domain	Assessment
baesys-mz.com	Renders 'BAE SYSTEMS' on an abbreviated brand domain with a country-style suffix.
baesys-pe.com	Renders 'BAE Systems'. Same abbreviation pattern and naming scheme as baesys-mz.com.
baesystems-alight.com	Renders a BAE Systems login page. Credential capture against the UK's largest defence prime.
baesystemsbenefitportal.online	Renders a BAE Systems login page framed as an employee benefits portal - an HR pretext rather than an IT one, which typically bypasses security-awareness framing.
internalrr.com	Renders 'EIS Command Center Rolls-Royce Civil Aerospace'. The domain asserts an internal system and the page reproduces a named one.

Domain	Assessment
mmemd-map.com	Renders 'MMEM Defence Intranet' - an intranet presentation with no corresponding organisation.
modnet.space	Renders 'ModNet Login'. MODNET is the MoD's own corporate network; this is the single most sensitive impersonation in the set.
sansiro.monster	Renders 'MBDA - Creer un compte' (create an account) on an unrelated throwaway domain. Account creation against a missile-systems manufacturer.
archwingsconsulting.com	'Trusted Delivery Services for Ministry of Defence Projects'. Asserts an MoD delivery relationship with no supporting corporate footprint.
defence-bid.com	'DefenceBid Solutions Win High-Value MOD Contracts'. Targets suppliers seeking MoD work - a population that self-selects for willingness to share company and personnel detail.
defensecareer.org	'Defence Careers' - recruitment framing, the documented initial-access pretext against this sector.
defensesymposium.info	'Personal Information - 2026 Defense & Industry Symposium'. An event registration form collecting personal data from defence-industry attendees.
dsrainstitute.com	'Defence Supplier Readiness Assessment' - an invented accreditation, a recognised route to collecting company and clearance detail.
lmi.army	Registered on the .army TLD rendering 'Lockheed Martin Inu'. The TLD choice is the signal.
newhorizondefence.com	'Exclusive Defence Access. Global Reach' - gatekeeper framing aimed at suppliers.
raytheon.txjobs.info	'Raytheon TX Jobs' on a brand-bearing .info domain. Employment-themed lures against defence primes are the tradecraft publicly reported against the sector.
s-vehicles.com	'S-Vehicles - Defence Equipment Solutions'. Vehicle-supply positioning with no verifiable trading history.
ultra-pce.com	Renders 'Data Processing Ultra PCS', reproducing a real Ultra business unit name.
mbda-it.com	Brand-bearing domain on the MBDA name serving a holding page. Not currently weaponised; worth watching because the name is already held.

Webamon sector threat assessment. Findings derive from rendered page content observed between 1 January and 3 August 2026; liveness was established by direct DNS and HTTP probe on 3 August 2026. Screenshots are reproduced from the scan that first captured each page. Every finding was verified by reading its rendered page. No finding derives from domain-string, permutation or certificate matching. Counts reflect the visibility of this corpus: targeted, email-delivered activity against this sector is not observable here and its absence from this report should not be read as its absence in fact.
